TECHNICAL DATA SHEET  101
DULUX EMULSION

DESCRIPTION
Dulux Emulsion is a premium quality emulsion paint formulated to give superior performance.

TYPICAL USES
Suitable as a finishing coat for interior/exterior concrete and cement rendered surfaces to give an attractive, even matt finish.

KEY BENEFITS
- High Opacity
- High Spreading Rate
- Ideal for Long Term Exposure
- High Scrub Resistance
- Superior Durability

PRODUCT INFORMATION

Composition
- Pigment: Lightfast Non-Lead Pigments
- Binder: Acrylic Copolymer Emulsion
- Solvent: Water

Pack Size: 4L, 20L
Colour Range: Refer to the appropriate Colour Guide
Finish: Matt
Volume Solids: 55-70%
Theoretical Spreading Rate: Up to 15sq.meter per litre on a smooth, non-porous surface

Drying Information
- Touch Dry: 10-20mins
- Hard Dry: 1-2hrs
- Opacity: 2 coats

Film Properties
- Chemical Resistance: Not suitable
- Heat Resistance: Not suitable for use on heated surfaces
- Water Resistance: Withstands humidity and rain once fully cured

APPLICATION INFORMATION

Method of Application: Brush, roller or conventional spray.

Coverage: Up to 15 sq.m per litre on non-porous surface can be achieved under normal conditions

Thinning
- Brush/Roller: Stir well before application by brush or roller. Do not thin
- Conventional Spray: Thin 4 parts of paint with 1 part of clean water to aid atomization.

Cleaning Up: After use, remove as much product as possible from application equipment before cleaning with water. If you have left over paint, dispose of it responsibly.
SYSTEMS AND COMPATIBILITY

Stir thoroughly before use. Seal new or bare surfaces with appropriate primer. The normal finishing process is 2 full coats of Dulux Emulsion.

SURFACE PREPARATION

Surfaces must be clean and dry before painting. All surfaces must be clean and free from grease, oil and other contaminants. Remove all dirt, grease, flaking paint, loose surface powder. Where necessary, wash the surface to remove dirt, grease and powdery or dusty residues. Rinse with water and allow to dry. Kill fungi and algae with CAP Biocidal Wash. Repair cracks, holes etc. with appropriate filler.

SAFETY INFORMATION

For detailed safety information, refer to the Material Safety Data Sheet

ADDITIONAL INFORMATION

Storage and Transportation:
Store in a cool, dry, well ventilated place protected from moisture, away from sources of heat, ignition and direct sunlight. Containers which are opened should be properly resealed and kept upright to prevent leakage. Do not use or store any paint container by hanging on a hook. Store separately from oxidizing agents, strongly alkaline materials, strongly acidic materials, amines, alcohols and water

To prevent spillage, store and transport upright
